

Services Overview

Insurance Operations & Technology Consulting

CORE SERVICES

— 01

Epic Optimization

Deep configuration, security, workflows, and data structure — so Epic works the way your agency actually runs.

KEY OUTCOMES

Clean, consistent data · Reliable reporting · Reduced E&O; exposure · Standardized workflows

— 02

Applied Ecosystem Expertise

Design how every tool in the Applied ecosystem integrates and works together inside Epic.

KEY OUTCOMES

CSR24 certificate automation · Indio digital intake · Tarmika quoting & submissions · Epic Quotes standardization

— 03

Workflow & Process Design

Eliminate bottlenecks and create documented, repeatable SOPs across every critical agency workflow.

KEY OUTCOMES

Certificates & renewals · New business workflows · Faster execution · Clear accountability

— 04

Data, Reporting & Automation

KPI dashboards, reporting alignment, and automation strategy — from API/SDK integration through execution.

KEY OUTCOMES

Real-time insights · Better decisions · Less manual work · Integration alignment

— 05

Training & Adoption

Hands-on training for staff and leadership. Role-based guidance that ensures changes actually stick.

KEY OUTCOMES

Higher system adoption · Long-term sustainability · Leadership alignment

Strategic Advisory

Long-term operational partnership — technology selection, vendor guidance, and continuous improvement.

KEY OUTCOMES

Technology strategy · Vendor guidance · Ongoing optimization

AMS DATA MIGRATION

Moving to Epic? Do It Right the First Time.

End-to-end migration consulting for agencies moving to Applied Epic — particularly in acquisition scenarios. Covers data transfer, workflow setup, and team readiness from the proposal stage all the way through go-live. The earlier a migration specialist is engaged, the better the outcome.

ENGAGEMENT PROCESS

01

Assess

Deep-dive into your Epic configuration, workflows, and data structure to identify gaps and opportunities.

02

Align

Define clear objectives, success metrics, and a roadmap aligned with your agency's operational goals.

03

Optimize

Execute targeted improvements — configuration, workflows, reporting, and integrations — with precision.

04

Enable

Train your team, document the changes, and ensure full adoption so improvements deliver lasting value.
